Attorneys for Defendants

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF CALIFORNIA

**ASSOCIATION OF AMERICAN
RAILROADS and AMERICAN SHORT
LINE AND REGIONAL RAILROAD
ASSOCIATION,**

Plaintiffs,

v.

**LIANE M. RANDOLPH, in her official
capacity as Chair of the California Air
Resources Board; STEVEN S. CLIFF, in
his official capacity as Executive
Officer of the California Air Resources
Board; and ROB BONTA, in his official
capacity as Attorney General of the
State of California,**

Defendants.

2:23-cv-01154-DJC-JDP

**MEMORANDUM IN SUPPORT OF
DEFENDANTS' CROSS-MOTION FOR
SUMMARY JUDGMENT OR, IN THE
ALTERNATIVE, MOTION FOR A STAY
OR DISMISSAL UNDER THE PRIMARY
JURISDICTION DOCTRINE; AND
DEFENDANTS' OPPOSITION TO
PLAINTIFFS' MOTION FOR SUMMARY
JUDGMENT**

Date: April 25, 2024
Time: 1:30 PM
Courtroom: 10 (13th Floor)
Judge: Hon. Daniel J. Calabretta
Trial Date: Not Set
Action Filed: June 6, 2023

TABLE OF CONTENTS

	Page
INTRODUCTION	1
STATEMENT OF FACTS	2
A. Locomotive Emissions and their Regulation.....	2
1. EPA’s Regulation of Locomotive Emissions	2
2. Railroad Policies Concerning Locomotive Idling.....	3
3. State Regulation of Non-Road Vehicle Emissions, Including those from Locomotives	4
4. EPA’s Section 209(e)(2)(A) Authorization Process	6
B. California’s Mobile Source Emission Regulations	6
C. CARB’s In-Use Locomotive Regulation.....	7
D. Federal Regulation of “Rail Transportation” Under the ICCTA.....	8
E. Procedural History.....	11
STANDARD FOR SUMMARY JUDGMENT	11
ARGUMENT	12
I. Plaintiffs Have Not Established Standing for Any Claims Against the Idling Requirements	12
II. This Court Should Apply the Primary Jurisdiction Doctrine and Stay (or Dismiss) Any Remaining Claims.....	15
III. Defendants Are Entitled to Summary Judgment on Plaintiffs’ Pike Claims Under the Dormant Commerce Clause.....	19
A. Defendants Are Entitled to Summary Judgment	20
B. Plaintiffs’ Motion Should Be Denied	22
IV. Defendants Are Entitled to Summary Judgment on Plaintiffs’ <i>Scheiner</i> Claim against the Administrative Payment Requirement	24
V. Plaintiffs Are Not Entitled to Summary Judgment on Their Remaining ICCTA Claims	26
A. The CAA’s Preservation of State Authority to Control Non-New Locomotive Emissions Protects the Regulation	26
B. Plaintiffs Have Not Established that Categorical Preemption Applies Here	30
C. Plaintiffs Have Not Identified a Remedy to Which They Would Be Entitled Even If They Could Prevail.....	33
VI. Should the Court Conclude that Any Part of the Regulation Is Invalid, Defendants Request the Opportunity to Address Severability	35
CONCLUSION.....	35

INTRODUCTION

In the 1990 amendments to the Clean Air Act (CAA), Congress established a cooperative federalism structure for the control of emissions from locomotives (and other non-road vehicles). It required the United States Environmental Protection Agency (EPA) to establish emission standards for *new* locomotives, and preserved several ways for States to regulate emissions from locomotives that are no longer new. Congress took these steps because it understood that locomotives produce substantial amounts of harmful pollution. For the same reason, the California Air Resources Board (CARB) promulgated this In-Use Locomotive Regulation (Regulation). CARB is pursuing the paths for state regulation that Congress expressly preserved, including seeking EPA authorization of this Regulation under Section 209(e)(2)(A), 42 U.S.C. § 7543(e)(2)(A). EPA is actively considering CARB's authorization request.

Plaintiffs nonetheless ask this Court to cut the CAA's procedures short and invalidate the Regulation before EPA has an opportunity to make a single determination. Plaintiffs argue that the Interstate Commerce Commission Termination Act (ICCTA) and the dormant Commerce Clause preclude the Regulation. But Plaintiffs have not established standing, under either legal theory, to challenge one part of the Regulation: the Idling Requirements. And neither of Plaintiffs' claims can be sustained in the face of Congress's intentional choice to permit state regulation of non-new locomotive emissions. However, until EPA acts on CARB's pending authorization request, there is some uncertainty about *which* congressionally authorized path is at issue for *which* of the Regulation's provisions. Thus, this Court should stay what remains of this case under the primary jurisdiction doctrine to allow EPA to complete its proceeding—the results of which will affect the analysis of Plaintiffs' remaining claims.

Should the Court proceed to the merits, it should grant Defendants' summary judgment on all remaining claims under the dormant Commerce Clause because Plaintiffs have not established, and cannot establish, the essential elements for those claims. This Court should also deny Plaintiffs' summary judgment on all remaining

1 ICCTA preemption claims because (1) ICCTA does not preempt what the CAA
 2 authorizes and (2) the regulatory requirements at issue are not within the scope of
 3 categorical ICCTA preemption. Moreover, Plaintiffs also have not identified a remedy to
 4 which they would be entitled, even if they prevailed.

5 **STATEMENT OF FACTS**

6 **A. Locomotive Emissions and their Regulation**

7 Diesel-powered locomotives emit multiple harmful pollutants, including particulate
 8 matter of 2.5 microns or less (PM_{2.5}) and nitrogen oxides (NO_x). ECF No. 18-3 at 16;
 9 *see also id.* at 14-15, 60-61. These pollutants cause serious health effects including
 10 premature death, cancer, increased hospitalizations for heart and lung disease, asthma,
 11 and decreased lung function. *Id.* at 16-17, 24-25. Children and the elderly are most
 12 vulnerable, *id.* at 16, along with those who live in already overburdened communities
 13 located near railroad operations, *id.* at 14, 61; *see also* ECF No. 19-1. Locomotives also
 14 emit large amounts of the greenhouse gases (GHGs) that are causing climate change,
 15 leading to, *inter alia*, heat-related deaths, extreme wildfires, and threats to the State's
 16 water supply and economy. ECF No. 18-3 at 63; Exh. 14 at 13, 38-40.¹

17 The CAA establishes a regulatory framework for limiting the harmful pollution
 18 emitted by locomotives (and other non-road vehicles and engines). That framework
 19 establishes roles for EPA, for California, and for other States, as described below.

20 **1. EPA's Regulation of Locomotive Emissions**

21 EPA is required to establish standards to control harmful emissions from *new*
 22 locomotives. 42 U.S.C. § 7547(a)(5). These regulations are codified in Title 40, Part
 23 1033 of the Code of Federal Regulations, whose Subpart B (sections 1033.101–
 24 1033.150) is titled “Emission Standards and Related Requirements.” EPA's standards
 25 include limits on exhaust emissions from line-haul and switch locomotives, 40 C.F.R.
 26 § 1033.101(a), (b); limits on “crankcase emissions,” *id.* § 1033.115(a); and a requirement
 27 to install idling control devices with particular specifications, *id.* § 1033.115(g).

28 ¹ All citations to exhibits refer to those attached to the Decl. of Michael S. Dorsi.

1 EPA's idling-control standard requires all "new" locomotives—whether brand new
 2 or remanufactured—to "be equipped with automatic engine stop/start" (AESS) devices,
 3 that will "shut off the main locomotive engine(s) after 30 minutes of idling (or less)," 40
 4 unless one of four conditions is present. 40 C.F.R. § 1033.115(g). It is "a violation of 40
 5 CFR § 1068.101(b)(1) to circumvent" this idling standard. *Id.* Section 1068.101(b)(1)
 6 prohibits "everyone"—including locomotive operators—from tampering with the AESS
 7 devices. *Id.* § 1068.101(b)(1); *see also id.* § 1033.15(b) (describing "everyone").²
 8 Tampering includes "remov[ing] or render[ing] inoperative any device," as well as
 9 operating the locomotive in a way "that renders the emission control system inoperative."
 10 *Id.* § 1068.101(b)(1); SUF ¶¶ 2, 3. Section 1068.101(b)(1) also provides that "the
 11 standard-setting part"—i.e., Part 1033—"may include additional provisions regarding
 12 actions prohibited." *Id.* Thus, the *additional* prohibition against "circumvent[ion]" in
 13 Section 1033.115(g) extends to an operator's use of "the AESS system in a manner
 14 other than that for which the system was designed and implemented per a railroad's
 15 policy directive." 73 Fed. Reg. 37,096, 37,123 (June 30, 2008); SUF ¶¶ 4, 5.

16 **2. Railroad Policies Concerning Locomotive Idling**

17 Federal law is not the only reason railroads limit locomotive idling. Reducing idling
 18 also reduces fuel and engine maintenance costs, extends engine life, and improves
 19 operator well-being due to decreased noise levels. SUF ¶ 7; Exh. 13 (EPA website); *see*
 20 *also* Exh. 4 at 6 (AAR estimating "annual savings of approximately \$2 million in fuel"
 21 from idling reductions); 73 Fed. Reg. at 37,124 (recognizing "fuel savings" from idling
 22 limits). For these reasons, railroads have "had manual shut-down policies for decades,"
 23 as Plaintiff AAR told EPA in 2007. Exh. 3 at 3; SUF ¶ 9. And some railroads voluntarily
 24 began to adopt "idling reduction technology" that allowed for more frequent shut-downs,

25 _____
 26 ² Plaintiffs erroneously suggest CARB asserted EPA regulations do not apply to
 27 locomotive operators. Pl. SUF ¶¶ 70, 71. In fact, CARB correctly noted that its
 28 Regulation, unlike EPA's, does not apply to manufacturers. ECF No. 18-3 at 219
 (Regulation "requires no changes to ... design or manufacture/remanufacture"); ECF No.
 30-3 at 56 (responding to quoted text from EPA regulation "directed at manufacturers").
 In any event, EPA's regulations speak for themselves. *See also* MTD Order 14:9-12.

1 even before EPA required AESS devices. *Id.* As EPA put it, the “individuals responsible
 2 for developing railroad policies have [no] incentive to encourage or allow unnecessary
 3 idling.” 73 Fed. Reg. at 37,123.

4 **3. State Regulation of Non-Road Vehicle Emissions, Including** 5 **those from Locomotives**

6 When it expanded the CAA to cover non-road vehicles (including locomotives),
 7 Congress intentionally preserved some state regulatory authority, building on the
 8 framework Congress had previously enacted for (on road) motor vehicles. Under that
 9 framework, States are preempted from enforcing their own *new* motor vehicle emission
 10 standards. 42 U.S.C. § 7543(a). EPA is required to waive that preemption for California
 11 “standards” and “accompanying enforcement procedures,” unless one of three findings is
 12 supported by the record. *Id.* § 7543(b)(1); *see also Motor & Equip. Mfrs. Ass’n, Inc. v.*
 13 *EPA (MEMA I)*, 627 F.2d 1095, 1114 (D.C. Cir. 1979) (describing consideration of
 14 “enforcement procedures”). Most other States may choose to adopt California’s
 15 standards as their own. 42 U.S.C. § 7507. And all States may, without EPA approval,
 16 regulate “the use, operation, or movement” of motor vehicles—regulations often referred
 17 to as “in-use requirements.” *Id.* § 7543(d); *Pac. Merch. Shipping Ass’n v. Goldstene*,
 18 517 F.3d 1108, 1115 (9th Cir. 2008). This effectively creates three categories of state
 19 regulations in the motor vehicle context: (1) emission “standards” for new motor
 20 vehicles, 42 U.S.C. § 7543(b)(1); (2) their “accompanying enforcement procedures,” *id.* §
 21 7543(b)(1)(C); and (3) “in-use requirements” for non-new vehicles, *id.* § 7543(d). The
 22 first and second categories require an EPA waiver to be enforceable; the third does not.

23 Congress kept a similar general design for non-road vehicles, with modifications. It
 24 expressly preempted *all* States, including California, from regulating emissions from two
 25 categories of non-road vehicles: new locomotives, 42 U.S.C. § 7543(e)(1)(B); and
 26 certain, new small-horsepower construction and farm vehicles, *id.* § 7543(e)(1)(A).
 27 Outside those two categories, Congress impliedly preempted States from enforcing
 28 “standards [or] other requirements” and “accompanying enforcement procedures” for

1 *both* new and non-new non-road vehicles. *Id.* § 7543(e)(2)(A); *see also Engine Mfrs.*
 2 *Ass’n v. EPA*, 88 F.3d 1075, 1092 (D.C. Cir. 1996) (rejecting interpretation limiting this
 3 preemption to *new* non-road vehicles). As with new motor vehicles, EPA must waive this
 4 preemption—must “authorize” California regulations that would otherwise be
 5 preempted—absent at least one of three specified findings. 42 U.S.C. § 7543(e)(2)(A).
 6 Congress also permitted most other States to adopt and enforce California’s authorized
 7 regulations, 42 U.S.C. § 7543(e)(2)(B), and preserved state authority for “in-use
 8 requirements”—*e.g.*, limits on the mode or use of non-road vehicles—without EPA
 9 approval, *Engine Mfrs.*, 88 F.3d at 1090 (upholding “EPA’s interpretation that § 213(d)
 10 incorporates into the nonroad regime at least the reservation of the states’ right to
 11 impose in-use regulations found in § 209(d)”; *id.* at 1082 (describing these regulations).

12 The CAA thus requires EPA authorization for more categories of state regulations
 13 for non-road vehicles as compared to motor vehicles. Specifically, for *new* non-road
 14 vehicles, Section 209(e) impliedly preempts “other requirements,” in addition to
 15 “standards” and “accompanying enforcement procedures.” *Compare* 42 U.S.C. §
 16 7543(e)(2)(A) *with id.* § 7543(b)(1). And Section 209(e) also impliedly preempts
 17 “standards,” “other requirements,” and “enforcement procedures” for *non-new* non-road
 18 vehicles, whereas preemption in the motor vehicle context extends only to *new* vehicles.
 19 *Compare id.* § 7543(e) *with id.* § 7543(a). But, in both contexts, no EPA approval is
 20 required for state “in-use requirements.” *Engine Mfrs.*, 88 F.3d at 1090.

21 State regulations in any of these categories are frequently submitted to EPA in
 22 State Implementation Plans (SIPs) to meet federal air quality standards. *E.g.*, 82 Fed.
 23 Reg. 42,233 (Sept. 7, 2017) (Maine). SIP submittals must provide “necessary
 24 assurances that the State ... is not prohibited by any provision of Federal ...law from
 25 carrying out” those regulations. 42 U.S.C. § 7410(a)(2)(E). Thus, where a Section
 26 209(b)(1) waiver or Section 209(e)(2)(A) authorization is necessary in order to enforce a
 27 particular state regulation, States submit the regulations *after* the waiver or authorization
 28 is granted. *E.g.*, 81 Fed. Reg. 39,424, 39,430 (June 16, 2016) (approving SIP

1 submission because “EPA has issued waivers or authorization under section 209 for all
 2 of the subject regulations”). “Once approved by EPA, a SIP becomes federal law.”
 3 *Comm. for a Better Arvin v. EPA*, 786 F.3d 1169, 1174 (9th Cir. 2015) (cleaned up).

4 **4. EPA’s Section 209(e)(2)(A) Authorization Process**

5 EPA’s Section 209(e)(2)(A) proceedings begin with a request for authorization from
 6 California that includes the State’s determination that its nonroad vehicle “standards will
 7 be, in the aggregate, at least as protective of public health and welfare as applicable
 8 Federal standards.” 42 U.S.C. § 7543(e)(2)(A). EPA must then consider California’s
 9 request in a public proceeding. *Id.*; 40 C.F.R. § 1074.101(b). If none of the three
 10 statutory bases for denial are established by the record, EPA “shall” grant the
 11 authorization. 42 U.S.C. § 7543(e)(2)(A).

12 When a California request includes locomotive regulations, EPA will determine, on
 13 a case-by-case basis, whether those regulations are preempted under Section
 14 209(e)(1)—and thus ineligible for authorization—because they regulate new
 15 locomotives. 42 U.S.C. § 7543(e)(2)(A); 88 Fed. Reg. 77,004, 77,007-08 (Nov. 8, 2023).
 16 EPA’s regulations provide that a locomotive ceases to be “new” when the earlier of two
 17 events occurs: (1) the locomotive’s equitable or legal title is transferred to an ultimate
 18 purchaser, or (2) the locomotive is placed into service (or back into service if the
 19 locomotive has been remanufactured). 40 C.F.R. § 1033.901. EPA has indicated it
 20 “intends to consider the reasoning of *Allway Taxi*” when determining whether a California
 21 regulation applies to new or non-new locomotives. 88 Fed. Reg. at 77,006. In that case,
 22 the court held that preemption of the regulation of “new” motor vehicles extends “only ...
 23 to the manufacture and distribution” of those vehicles. *Allway Taxi, Inc. v. City of New*
 24 *York*, 340 F. Supp. 1120, 1124 (S.D.N.Y. 1972), *aff’d*, 468 F.2d 624 (2d Cir. 1972).

25 **B. California’s Mobile Source Emission Regulations**

26 California began controlling emissions from motor vehicles well before Congress
 27 authorized federal controls. *MEMA I*, 627 F.2d at 1109. The same was true of non-road
 28 vehicles: when Congress turned its attention to those sources in 1990, “California was

1 already in the lead.” *Engine Mfrs.*, 88 F.3d at 1090. And for good reason: California
 2 faces “severe air pollution problems.” *Id.* California’s long-standing struggles to reduce
 3 ozone (or smog) are well documented. Exh. 19 at 2-4; Exh. 18 at 18. Although the
 4 State has made significant progress on that front, tens of millions of Californians still live,
 5 work, and learn in areas with the worst ozone levels in the country. ECF Nos. 18-10 at
 6 1-2, 18-3 at 59; Exh. 18 at 18. California also has numerous, densely populated regions
 7 where levels of PM2.5 exceed federal and state air quality standards. Exh. 18 at 14.
 8 And California faces extreme threats from climate change caused by greenhouse gas
 9 emissions. *E.g.*, Exh. 14 at 22-23. Mobile sources—including non-road vehicles—are
 10 the largest contributors to these pollution challenges. ECF No. 18-10 at 4, 12.

11 To protect public health and meet its CAA obligations, CARB has promulgated
 12 increasingly stringent and comprehensive mobile source emission regulations. It now
 13 regulates emissions from all types of motor vehicles—from motorcycles to passenger
 14 cars and from buses to heavy-duty trucks. *E.g.*, Cal. Code Regs., tit. 13, §§ 1950-1978,
 15 § 2016. CARB also regulates emissions from a wide range of non-road vehicles,
 16 including diesel-fueled fleets (e.g., bulldozers, graders, etc.); small off-road engines;
 17 commercial harborcraft; and ocean-going vessels docked in California ports. *E.g.*, Cal.
 18 Code Regs., tit. 13, Div. 3, Ch. 9.

19 **C. CARB’s In-Use Locomotive Regulation**

20 CARB has also long sought to reduce locomotive pollution in California. To that
 21 end, it entered into two Memoranda of Understanding with the major railroads operating
 22 in the State. ECF No. 18-3 at 45-48; see *also* Exhs. 1 (1998), 2 (2005). Those voluntary
 23 arrangements have not, however, produced the needed emission reductions. ECF No.
 24 18-3 at 48. Indeed, as other mobile sources in California have become significantly
 25 cleaner (due, at least in part, to CARB regulations), locomotives have lagged behind.
 26 For example, CARB predicted that, by 2023, moving freight by rail would emit *more* NOx
 27 and PM2.5 than moving the same freight by truck. Exh. 15.

1 Finding that greater emission reductions were needed from locomotives operating
 2 in California, CARB promulgated the Regulation to reduce non-new locomotive
 3 emissions, using the authority Congress preserved in Section 209(e). ECF No. 18-3 at
 4 15, 61-67. The Regulation has four main components: (1) Idling Requirements; (2) In-
 5 Use Operational Requirements; (3) Spending Account Requirements; and (4) Reporting,
 6 Recordkeeping and Registration Requirements. *Id.* at 20. It also requires an annual
 7 Administrative Payment of \$175 per locomotive to cover implementation costs. *Id.* at 51.
 8 These requirements are described in Defendants' Motion to Dismiss, ECF No. 20 at 3-4;
 9 in the Court's order on that motion, ECF No. 48 (MTD Order) 3-4; and below.

10 CARB estimated that from 2023 to 2050 the Regulation would reduce cumulative
 11 statewide emissions by approximately 7,455 tons of PM_{2.5}, 389,630 tons of NO_x, and
 12 21.9 million metric tons of GHG. ECF No. 18-3 at 26. This is anticipated to reduce the
 13 average cancer risk associated with living near railyards in California by more than 90
 14 percent between 2020 and 2045. *Id.* at 24. CARB also estimated thousands fewer
 15 premature deaths and emergency room visits, and hundreds fewer hospital admissions
 16 from respiratory and cardiovascular illnesses in 2050, with a total valuation from avoided
 17 health outcomes between 2024 and 2050 of approximately \$32 billion. *Id.* at 25.

18 On November 8, 2023, CARB requested authorization from EPA pursuant to CAA
 19 Section 209(e)(2)(A). ECF No 21-1 at 33-34. In light of that pending authorization
 20 request, CARB has not yet submitted the Regulation itself for approval into California's
 21 SIP. *See supra* 5:25-6:2. However, the commitment to promulgate a regulation like this
 22 one was included in CARB's 2022 State Strategy for the State Implementation Plan
 23 which was submitted for EPA's approval on February 22, 2023. Exh. 16 at 1, 34; Exh.
 24 17. This commitment is the largest NO_x reduction strategy in the Strategy, responsible
 25 for more than 31% of the total NO_x reductions. ECF No. 30-4 at 2.

26 **D. Federal Regulation of "Rail Transportation" under the ICCTA**

27 Congress took a different approach to the regulation of rail "transportation" than it
 28 did to the regulation of locomotive emissions. Specifically, Congress chose to preempt

1 most state regulation of the transport of passengers or goods, giving exclusive
 2 jurisdiction to the Surface Transportation Board (STB) over “transportation by rail
 3 carriers, and the remedies provided [by the statute] with respect to rates, classifications,
 4 rules (including car service, interchange, and other operating rules), practices, routes,
 5 services, and facilities of such carriers.” 49 U.S.C. § 10501(b)(1).³ STB has recognized
 6 that its jurisdiction over “transportation by rail” does not “interfere with the role of state
 7 and local agencies in implementing Federal environmental statutes, such as the Clean
 8 Air Act.” *Ass’n of Am. Railroads v. S. Coast Air Quality Mgmt. Dist. (AAR)*, 622 F.3d
 9 1094, 1098 (9th Cir. 2010) (internal quotation marks omitted).

10 The “transportation” to which STB’s jurisdiction, and thus ICCTA preemption,
 11 attaches is defined to include, *inter alia*, “a locomotive,” a “property,” or a “facility.” 49
 12 U.S.C. § 10102(9)(A). Accordingly, STB can have jurisdiction over some of a rail
 13 carrier’s equipment, properties, or activities but not others. *E.g.*, *Peninsula Corridor Joint*
 14 *Powers Board – Petition for Decl. Ord.*, No. FD 35929, 2015 WL 4065035, at *2 (S.T.B.
 15 July 2, 2015) (Caltrain “subject to the Board’s jurisdiction” for some purposes but “[*this*]
 16 *Project* is not subject to the Board’s jurisdiction, and therefore, federal preemption does
 17 not apply.”) (emphasis added).

18 In addition, Congress did not grant STB jurisdiction over *all* transportation by rail.
 19 Rather, when rail transportation occurs within a single State it must be “part of the
 20 interstate rail network” for the STB to have jurisdiction. 49 U.S.C. § 10501(a)(2)(A).
 21 Certain types of rail transportation are also exempt from STB jurisdiction—*e.g.*, “public
 22 transportation provided by a local government authority.” *Id.* § 10501(c)(2)(A).

23 Thus, STB’s exclusive jurisdiction and ICCTA preemption do not extend to certain
 24 passenger locomotives operating in California. Plaintiff ASLRAA has conceded that
 25 some of its members operate such locomotives in California. ECF 29-4 ¶ 8 (asserting
 26 members do not do so “*exclusively*”) (emphasis added); FAC 18 (Mendocino Railway).

27
 28 ³ Other areas of exclusive STB jurisdiction are not at issue. *Id.* § 10501(b)(2).

1 And, as another example, the San Joaquin Regional Rail Commission (an AAR member)
2 operates a commuter service between Stockton and San Jose. ECF 21-1 at 37-38.

3 The STB similarly lacks jurisdiction when the entire route traveled is within a single
4 State. For example, Union Pacific Railroad (an AAR member) moves sand and gravel
5 from quarries to processing plants on two routes entirely within California. Exhs. 8, 9.
6 And BNSF Railway (also an AAR member) advertises similar services on its website, as
7 does California Western Railroad (an ASLRRRA member). Exh. 6 at 2 (offering
8 “Dedicated Train Service” to move “high volumes of single commodities from a single
9 origin to a single destination”); Exh. 7 at 1 (tariffs for “*local* and interchange” routes)
10 (emphasis added).⁴ When a non-railroad company uses locomotives to do the same
11 thing, they are referred to as “Industrial Operators.” Cal. Code Regs., tit. 13, § 2478.3.

12 In addition, when locomotives are involved in “intermodal” or “transloading”
13 services, those can be outside STB’s jurisdiction—and ICCTA preemption—when the rail
14 portion of those services is exclusively in one State. Both “intermodal” and
15 “transloading” services involve the transfer of goods to other forms of transport—e.g.,
16 truck, ship, or plane—for part of the route. See 49 U.S. Code § 22401(5) (defining
17 “intermodal”); Exh. 20. (defining “transloading”). So, a locomotive may move goods from
18 the shipper’s point of origin in California to another point in California, where the goods
19 are then transferred to trucks for the rest of their journey. And that rail transportation
20 would not be operating as “part of the interstate rail network.” 49 U.S.C.
21 § 10501(a)(2)(A). Northern Sierra Railway appears to offer such a service. Exh. 10 at 3
22 (describing “transloading agreement”). And BNSF and Union Pacific have multiple
23 intermodal hubs in California, can provide these services, and have indicated they
24 operate “intrastate locomotives” in California. Exhs. 5, 21; see *a/so* Exh. 2 at 2. In fact,
25 a company called DrayNow markets an app by which it claims trucking businesses can
26

27 _____
28 ⁴ Based on its website, Defendants understand California Western Railroad to be
the same entity as Mendocino Railway. See <https://www.skunktrain.com/about/>.

1 gain access to the California intermodal market, picking up freight from BNSF and Union
2 Pacific in eleven different California locations. Exh. 11.

3 Finally, rail transportation moving goods to or from a ship at a California port is only
4 “part of the interstate rail network” if the rail transportation segment crosses California’s
5 borders or the “water” segment “is under common control, management, or
6 arrangement” with the rail segment. 49 U.S.C. § 10501(a)(1)(B).

7 **E. Procedural History**

8 Plaintiffs filed their First Amended Complaint (FAC) on October 13, 2023. ECF No.
9 18. The Regulation became final under California law on October 27, 2023. ECF No.
10 21-1 at 27. On February 6, 2024, this Court dismissed all claims against the Spending
11 Account and In-Use Operational Requirements, MTD Order at 11:24-28; all claims
12 against the “the locomotive equipment aspects” of the Idling Requirements (which
13 included dismissal of Plaintiffs’ Locomotive Inspection Act claim in its entirety), *id.* at
14 14:6; and Plaintiffs’ facial challenges under ICCTA and the dormant Commerce Clause,
15 *id.* at 17:21-22, 19:19-20. The Court did not dismiss Plaintiffs’ as-applied challenges
16 under ICCTA and the dormant Commerce Clause to certain Idling Requirements—those
17 that are “idling limits” and “impose new requirements on Plaintiffs’ members,” *id.* at
18 14:17-20—or to the Reporting and Recordkeeping or Administrative Payment
19 Requirements, *id.* at 19:3-4, 20:25-26, 22:4-5.

20 On February 27, 2024, EPA issued its notice inviting public comment on
21 California’s Section 209(e)(2)(A) authorization request. 89 Fed. Reg. 14,484, 14,486
22 (Feb. 27, 2024). Comments are due April 22, 2024. *Id.*

23 **STANDARD FOR SUMMARY JUDGMENT**

24 A party seeking summary judgment bears the initial burden of demonstrating the
25 absence of a genuine issue of material fact as to the basis for the motion. *Celotex Corp.*
26 *v. Catrett*, 477 U.S. 317, 323 (1986). “When the nonmoving party has the burden of
27 proof at trial, the moving party need only point out ‘that there is an absence of evidence
28 to support the nonmoving party’s case.’” *Devereaux v. Abbey*, 263 F.3d 1070, 1076 (9th

1 Cir. 2001) (quoting *Celotex*, 477 U.S. at 325). The court must “view[] the evidence in
 2 the light most favorable to the nonmoving party.” *Fontana v. Haskin*, 262 F.3d 871, 876
 3 (9th Cir. 2001). But “[c]onclusory, speculative testimony in affidavits and moving papers
 4 is insufficient to raise genuine issues of fact and defeat summary judgment.” *Soremekun*
 5 *v. Thrifty Payless, Inc.*, 509 F.3d 978, 984 (9th Cir. 2007).

6 ARGUMENT

7 I. PLAINTIFFS HAVE NOT ESTABLISHED STANDING FOR ANY CLAIMS AGAINST THE 8 IDLING REQUIREMENTS

9 “[P]laintiffs bear the burden to establish standing,” *Phillips v. U.S. Customs &*
 10 *Border Prot.*, 74 F.4th 986, 991 (9th Cir. 2023), and must “demonstrate standing for each
 11 claim that they press,” *TransUnion LLC v. Ramirez*, 594 U.S. 413, 431 (2021). At the
 12 summary judgment stage, Plaintiffs must “set forth by affidavit or other evidence” the
 13 “specific facts” that establish their standing. *Lujan v. Defs. of Wildlife*, 504 U.S. 555, 561
 14 (1992) (emphasis added, cleaned up). This Court has already rejected Plaintiffs’
 15 declarations as insufficient to establish injury from any requirement that is not an “idling
 16 limit.” MTD Order 14:3-14. But Plaintiffs have also not met their burden as to claims
 17 they press against “idling limits.” Defendants, not Plaintiffs are entitled to summary
 18 judgment on these claims.

19 “Plaintiffs have alleged no [concrete] intent” to violate any of the Idling
 20 Requirements. MTD Order 13:8-9. Instead, Plaintiffs have offered non-specific
 21 assertions that their members will be “subject[ed] to new ... idling limits,” ECF No. 29-1
 22 (“PI. MSJ”) at 11:18-19, for which they “will incur supervision costs and personnel
 23 training costs,” e.g., ECF No. 29-5 ¶ 11. This injury claims rest on false premises: that
 24 federal law imposes no obligations on the locomotive operator; and thus Plaintiffs’
 25 members do not currently train or supervise their employees to limit idling. PI. MSJ at
 26 16:2-3; ECF No. 29-6 ¶ 13. EPA’s regulations do impose idling limits *on operators*. See
 27 *supra* 3:1-15; SUF ¶¶ 1-5. Moreover, railroads have long voluntarily imposed idling
 28 limits on their own locomotives. *Id.* “When opposing parties tell different stories, one of

1 which is blatantly contradicted by the record, ... a court should not adopt that version of
 2 the facts for purposes of ruling on a motion for summary judgment.” *Duhn Oil Tool, Inc.*
 3 *v. Cooper Cameron Corp.*, 757 F. Supp. 2d 1006, 1009 (E.D. Cal. 2010) (quoting *Scott*
 4 *v. Harris*, 550 U.S. 372 (2007)). Plaintiffs have failed to establish that *any* of the Idling
 5 Requirements would require a change to their members’ training and supervision
 6 practices.

7 Considering the Idling Requirements individually underscores the point. Plaintiffs
 8 identify only subprovision 2478.9(c) as allegedly injuring their members. *E.g.*, ECF 29-6
 9 ¶ 13; SUF ¶ 8. Subprovision (c)(1) requires that operators “replace or repair a
 10 malfunctioning or broken AESS no later than 30 days after discovering the initial
 11 malfunction or break.” Cal. Code Regs., tit. 13, § 2478.9(c)(1). This is not an idling limit,
 12 and this Court correctly dismissed Plaintiffs’ challenge to this requirement for lack of
 13 standing. MTD Order 14:6-9.⁵ Subprovision (c)(2) applies only when a locomotive’s
 14 AESS device is inoperative and requires operators to “manually shut off” such a
 15 locomotive “no more than 30 minutes after” it becomes stationary unless one of four
 16 conditions is present. Cal. Code Regs., tit. 13, § 2478.9(c)(2). As Plaintiff AAR told EPA
 17 in 2007, “*railroads have had manual shut-down policies for decades.*” Exh. 3 at 3
 18 (emphasis added). Plaintiffs nonetheless opted to provide *no* information about their
 19 members’ current manual shut-down policies and *no* information about the training and
 20 supervision of employees concerning those policies. Moreover, given that excess idling
 21 increases costs, SUF ¶ 7, Plaintiffs have not explained why their members’ policies and
 22 practices would allow idling that would otherwise not occur (and cannot therefore be
 23 operationally necessary), simply because an AESS device is not working properly.

24 Plaintiffs claim no injury from the other subprovisions of the Idling Requirements.
 25 ECF No. 29-6 ¶ 13. On that ground alone, Defendants are entitled to summary
 26 judgment as to any claims against those other subprovisions that survived the Motion to

27 ⁵ Plaintiffs also submitted no evidence that their members currently train and
 28 supervise employees to allow AESS devices to remain inoperable for longer periods.

Dismiss. *Devereaux*, 263 F.3d at 1076.⁶ In any event, Plaintiffs have not established that any of those subprovisions will result in any *additional* training and supervision costs to their members.

Section 2478.9(a) prohibits an AESS-equipped locomotive from idling longer than 30 minutes unless one of the identified conditions is present. This requires operators to use already-installed AESS devices in accord with their EPA-established specifications. *Compare* Cal. Code Regs., tit. 13, § 2478.9(a) with 40 C.F.R. § 1033.115(g). Operators are already prohibited from “us[ing] the AESS system in a manner other than that for which the system was designed.” 73 Fed. Reg. at 37,123; 40 C.F.R. § 1033.115(g) (prohibiting “circumvent[ion]”); SUF ¶ 5. Plaintiffs have not established that subprovision 2478.9(a) “impose[s] new requirements on Plaintiffs’ members,” MTD Order 14:17, much less that those members currently train and supervise their employees to do anything other than what this subprovision requires. SUF ¶¶ 11, 15.

Subprovision 2478.9(b) prohibits operators from “remov[ing], tamper[ing] with, or disabl[ing]” the AESS devices already installed in their locomotives. All challenges to this subprovision were properly dismissed because “40 C.F.R. 1068.101(b) ... already prohibits ‘everyone’ from removing or rendering inoperative AESS equipment.” MTD Order 14:9-11; SUF ¶ 2, 3.

Finally, subprovision 2478.9(d) requires “[l]ocomotives equipped to connect to Wayside Power” to use that power and “turn off all engines” after 30 minutes where “Wayside Power is available.” Cal. Code Regs., tit. 13, § 2478.9(d).⁷ In other words, if the locomotive can plug into and use electricity, it must do so after 30 minutes rather than continuing to idle the diesel engine. Even if Plaintiffs consider this to be an “idling

⁶ Defendants attempted to confer with Plaintiffs as to which claims remained after the order on the Motion to Dismiss. Exh. 22. In light of Plaintiffs’ refusal to do so, Defendants address each Idling Requirement herein. Defendants do not concede, however, that challenges to “the locomotive equipment aspects of the” Idling Requirements remain live. MTD Order 14:6.

⁷ Subprovision 2478.9(e) exempts locomotives operating in zero-emission configuration from the Idling Requirements. Plaintiffs have not, and cannot, establish that this subprovision injures their members.

limit,” they have not asserted, much less established, any injury from it. In fact, this subprovision is only a “limit” on idling where the locomotive could otherwise idle for longer than 30 minutes—i.e., where one of the conditions specified in 40 C.F.R. § 1033.115(g) is present. Plaintiffs have provided no evidence establishing which of their members has locomotives equipped to connect to Wayside Power or what their current policies are concerning the use of that power by those locomotives. Plaintiffs have certainly not established that their members train and supervise employees to forego the cost savings of using Wayside Power where it is available. See *SUF* ¶¶ 12, 13.

“[T]here is an absence of evidence to support” Plaintiffs’ claims of injury—an issue on which they bear “the burden of proof.” *Devereaux*, 263 F.3d at 1076 (internal quotation marks omitted). Defendants are entitled to summary judgment. *Id.* At a minimum, Plaintiffs’ motion should be denied, or it should be deferred to permit Defendants to take discovery to examine Plaintiffs’ claims of injury. See Defendants’ Rule 56(d) Motion (“56(d) Motion”).

II. THIS COURT SHOULD APPLY THE PRIMARY JURISDICTION DOCTRINE AND STAY (OR DISMISS) ANY REMAINING CLAIMS

In its Order on Defendants’ Motion to Dismiss, this Court rejected Defendants’ request to apply the primary jurisdiction doctrine to what is left of this case, because the Court did not “see how resolution of claims related to [the Reporting and Recordkeeping Requirements, the Idling Requirements, or the Administrative Payment Requirement] falls within the special competence of the EPA, or would need to be harmonized with EPA approval.” MTD Order 9 n.6. Defendants respectfully request that the Court reconsider that conclusion. See *City of Los Angeles, Harbor Div. v. Santa Monica Baykeeper*, 254 F.3d 882, 885 (9th Cir. 2001). Defendants call the Court’s attention to new facts, including EPA’s recent solicitation of comments on CARB’s authorization request. Defendants also present facts and arguments they had neither reason nor opportunity to present on their Motion to Dismiss because they were not relevant to the dismissal Defendants sought of Plaintiffs’ CAA claim. Among those is Defendants’

1 position that, given the circumstances here, Defendants will not take enforcement action
2 until EPA acts on CARB's pending authorization request.⁸

3 On February 27, 2024, eleven days after this Court's Order on the Motion to
4 Dismiss, EPA published its solicitation of public comment on California's authorization
5 request. 89 Fed. Reg. at 14,484. EPA seeks comment on whether it should authorize
6 enforcement of CARB's Regulation—*in all its parts*—under Section 209(e)(2)(A). *E.g.*,
7 *id.* at 14,485 (specific references to Idling and Recordkeeping and Reporting
8 Requirements); *id.* (directing “interested parties” to CARB's authorization request for full
9 discussion of requirements). This Court should not decide that EPA need not or will not
10 authorize the requirements still at issue in this case when EPA is actively considering
11 that very issue. *San Francisco Herring Ass'n v. DOI*, 946 F.3d 564, 578 (9th Cir. 2019)
12 (“[C]ourts do not intrude on the agency's turf and thereby meddle in the agency's
13 ongoing deliberations.”). Rather, this Court should stay (or dismiss) what is left of this
14 case to allow EPA to complete its work.

15 Two aspects of EPA's special competence are implicated here—only one of which
16 was addressed on the Motion to Dismiss. First, as the Court is aware, EPA has
17 indicated it will determine whether California is impermissibly regulating new locomotives
18 before acting on the pending Section 209(e)(2)(A) authorization request. MTD Order
19 10:27-11:10. Second, EPA may also have to decide whether the regulatory provisions
20 at issue even require EPA authorization—in other words, whether they are “standards
21 [or] other requirements” under Section 209(e)(2)(A); “accompanying enforcement
22 procedures” under Section 209(e)(2)(A)(iii); or “in-use requirements” (which require no
23 EPA authorization to be enforceable). *See e.g.*, 88 Fed. Reg. 72,461, 72,475 (Oct. 20,
24 2023) (“[R]equirements [that] are not mobile source standards or not associated
25 compliance or enforcement mechanisms... would not require an authorization.”).

27 ⁸ Defendants, however, reserve the right to enforce any provisions for any time
28 period ultimately authorized by EPA, as well as any provisions for which EPA concludes
no authorization is necessary and for which the period for enforcement has not run.

Defendants did not previously address this second issue because Plaintiffs challenged only the Spending Account and In-Use Operational Requirements under the CAA. FAC ¶ 105. Defendants did not disagree with Plaintiffs that *those* requirements are “standards [or] other requirements” under Section 209(e)(2)(A). PI. MSJ 18:16-17, 19:25-26; MTD Reply 2:21-23. There was thus no reason to address these *other* requirements in moving to dismiss that claim. Defendants did not intend to suggest, however, that the Idling, Reporting and Recordkeeping, and Administrative Payment provisions do not require EPA authorization. MTD Order 9 n.6.

Neither EPA nor the Courts have illuminated the distinctions between “standards” and “other requirements.” Nor has a clear line been drawn between “standards and other requirements” and “accompanying enforcement procedures” for non-new vehicles that require EPA authorization and “in-use requirements” that do not require authorization but apply to those same vehicles. *See supra* 5:12-20.

However, EPA has previously authorized certain reporting and recordkeeping requirements—treating them as “accompanying enforcement procedures”—where they ensure other authorized requirements can be “effectively implemented and enforced.” 82 Fed. Reg. 6,525, 6,531 (Jan. 19, 2017); *see also, e.g.*, 88 Fed. Reg. 24,411, 24,414 (Apr. 20, 2023). EPA may well do the same here because these Reporting and Recordkeeping (and Administrative Payment) Requirements similarly enable implementation and enforcement of the Regulation’s more substantive provisions.⁹

EPA may also conclude that some of the Idling Requirements are “standards [or] other requirements” and the rest are “accompanying enforcement procedures.” Subprovision 2478.9(a), for example, proscribes how emission-control equipment required by EPA’s new-locomotive standards must be used in non-new locomotives operating in California. *Compare* Cal. Code Regs., tit. 13, § 2478.9(a) *with* 40 C.F.R. §

⁹ Defendants do not suggest that *all* emissions reporting and recordkeeping requirements are “accompanying enforcement procedures.” Based on EPA’s past actions, however, *these* requirements may well be.

1 1033.115(g) (codified in Subpart titled “Emission Standards and Related
 2 Requirements”).¹⁰ In the new vehicles context, “standards” include specifications of
 3 “emission-control technology with which [vehicles] must be equipped.” *Engine Mfrs.*
 4 *Ass’n v. S. Coast Air Quality Mgmt. Dist.*, 541 U.S. 246, 253 (2004). And phrases like
 5 “other requirements” can be “construed to embrace only objects similar in nature to
 6 those objects enumerated by the preceding specific words.” *Yates v. United States*, 574
 7 U.S. 528, 545 (2015) (internal quotation marks omitted). The other idling subprovisions
 8 likewise establish requirements for the use of emission-control technology or enable the
 9 implementation and enforcement of such requirements. In other words, EPA may
 10 conclude these provisions do not simply regulate “the use, operation, or movement of
 11 [the] vehicles” themselves. See 42 U.S.C. § 7543(d); see also 88 Fed. Reg. 72,461,
 12 72,462 (Oct. 20, 2023) (authorizing requirement that stationary ships reduce emissions
 13 by, *inter alia*, plugging into shore power).

14 The entire Regulation is currently before EPA. EPA’s recent notice suggests that
 15 the agency may conclude authorization is required for all provisions. See *supra* 16:3-9.
 16 While there is uncertainty here because of the novelty of these issues, that only
 17 underscores the appropriateness of the primary jurisdiction doctrine. At a minimum,
 18 there is no basis to conclude that EPA will *not* pass upon these requirements under the
 19 CAA. And any line drawing should be done by EPA, not this Court, in the first instance.
 20 42 U.S.C. § 7543(e)(2) (empowering EPA “to implement this subsection”).

21 Moreover, EPA’s action will have significant implications for what remains of this
 22 case. If EPA affirmatively authorizes any of the requirements at issue under Section
 23 209(e)(2)(A), that section will have to be harmonized with ICCTA and the dormant
 24 Commerce Clause. And if EPA concludes some or all of the requirements at issue are
 25 “in-use requirements,” then Congress’s decision to allow enforcement of such state laws,
 26 without EPA approval, will require a distinct harmonization analysis. See *Engine Mfrs.*,

27 _____
 28 ¹⁰ These Idling Requirements are therefore distinct from simpler idling limits that
 require only the manual shut-off of the vehicle.

88 F.3d at 1094 (upholding “EPA’s interpretation [of] § 213(d)”; see *also* 40 C.F.R., Part 1074, Appendix A to Subpart A (codifying EPA’s interpretation). In other words, “[u]ntil we know whether and, if so, to what degree” EPA grants Section 209(e)(2)(A) authorization, the court cannot know *which* harmonization analysis applies to *which* provisions of the Regulation. *Davel Commc’ns, Inc. v. Qwest Corp.*, 460 F.3d 1075, 1090 (9th Cir. 2006). This Court therefore, “cannot evaluate” Plaintiffs’ claims, *Davel*, 460 F.3d. at 1090, and, at most, could issue a decision contingent upon EPA’s decision, *Cent. Valley Chrysler-Jeep, Inc. v. Goldstene*, 529 F. Supp. 2d 1151, 1175-76 (E.D. Cal. 2007), *as corrected* (Mar. 26, 2008) (California standards authorized “under section 209” not preempted under other statute).

In the meantime, Defendants do not believe it is sufficiently clear that the requirements that remain at issue here are “in-use requirements” and can be enforced without EPA authorization. Accordingly, CARB does not plan to enforce these provisions until EPA acts on the pending authorization request.

III. DEFENDANTS ARE ENTITLED TO SUMMARY JUDGMENT ON PLAINTIFFS’ *PIKE* CLAIMS UNDER THE DORMANT COMMERCE CLAUSE

Plaintiffs claim the Regulation violates the dormant Commerce Clause’s *Pike* test which asks whether “the burden imposed on [interstate] commerce is clearly excessive in relation to the putative local benefits.” *Pike v. Bruce Church, Inc.*, 397 U.S. 137, 142, (1970); see *also* FAC ¶¶ 121, 123. This Court dismissed Plaintiffs’ facial claims under this theory, MTD Order 19:19-22, and all such claims against the Spending Account and In-Use Operational Requirements, *id.* at 11:24-27. Defendants are entitled to summary judgment on the *Pike* claims that remain—namely any as-applied claims against the Idling, Reporting and Recordkeeping, and Administrative Payment Requirements. Plaintiffs bear the burden of proof. *Rocky Mountain Farmers Union v. Corey*, 730 F.3d 1070, 1097 (9th Cir. 2013). But they cannot establish a cognizable burden under *Pike*.¹¹ At a minimum, Plaintiffs’ motion should be denied.

¹¹ Plaintiffs do not appear to have alleged, or moved for summary judgment on, a

A. Defendants Are Entitled to Summary Judgment

To prevail on their as-applied *Pike* claim as to any provision of the Regulation, Plaintiffs must first prove the “critical requirement”: that application to one or more of their members’ locomotives imposes a “substantial burden on interstate commerce.” *Nat’l Ass’n of Optometrists & Opticians v. Harris*, 682 F.3d 1144, 1148 (9th Cir. 2012). Only then would the Court consider whether that burden is clearly excessive in relation to the putative benefits. *Id.* at 1156 (“In the absence of [a] substantial burden on interstate commerce, we need not determine if the benefits of a statute are illusory.”); *see also Exxon Corp. v. Governor of Maryland*, 437 U.S. 117, 127–28 (1978) (rejecting *Pike* claim for failure to establish cognizable burden). Plaintiffs have not shown, and cannot show, a substantial burden on interstate commerce here.

“The mere fact that a firm engaged in interstate commerce”—including an interstate transportation company like an airline—“will face increased costs as a result of complying with state regulations does not, on its own, suffice to establish a substantial burden on interstate commerce.” *Ward v. United Airlines, Inc.*, 986 F.3d 1234, 1241–42 (9th Cir. 2021). Indeed, the Supreme Court recently affirmed dismissal of a *Pike* claim, despite allegations that “certain processing firms” would be required “to make substantial new capital investments.” *Nat’l Pork Producers Council v. Ross (NPPC)*, 598 U.S. 356, 367 (2023). In fact, cognizably significant burdens are found “only in rare cases.” *Nat’l Pork Producers Council v. Ross (Ross)*, 6 F.4th 1021, 1032 (9th Cir. 2021), *aff’d*, 598 U.S. 356 (2023). Because *Pike*’s heartland is anti-protectionism, the most typical cognizable burdens are discriminatory—found where the effects of the challenged law “may ... disclose the presence of a discriminatory purpose.” *NPPC*, 598 U.S. at 377. In the rarer case, a cognizable burden can arise “when a lack of national uniformity would impede *the flow* of interstate goods.” *Id.* at 379 n.2; *see also Ross*, 6 F.4th at 1032.

Pike claim as to the Administrative Payment Requirement. FAC ¶¶ 121-123; Pl. MSJ 24:20-23. Defendants address this requirement out of an abundance of caution.

1 Plaintiffs allege no discriminatory effects on interstate commerce, relying instead
 2 on the second type of burden. FAC ¶ 120; SUF ¶¶ 17-19. But Plaintiffs cannot establish
 3 that any of the Regulation’s requirements will impede the flow of interstate goods; and
 4 they certainly cannot do so for the requirements to which challenges remain after the
 5 Motion to Dismiss. As Plaintiffs correctly observe, state laws have been found impede
 6 the flow of interstate goods when, for example, the laws require “‘breaking up and
 7 reassembling long trains ... before entering and after leaving that regulating state.’” PI.
 8 MSJ 24:4-5 (quoting *S Pac. Co. v. Arizona ex rel. Sullivan*, 325 U.S. 761, 775 (1945)). A
 9 law requiring a change in heavy-duty truck mudguards at the state border similarly
 10 imposed a substantial burden on interstate commerce by “causing a significant delay.”
 11 *Bibb v. Navajo Freight Lines, Inc.*, 359 U.S. 520, 527 (1959) (“It was found that from two
 12 to four hours of labor are required to install or remove [the relevant] mudguard.”).

13 The application of the Idling Requirements, Recordkeeping and Reporting
 14 Requirements, or the Administrative Payment Requirement to Plaintiffs’ members would
 15 not cause any delay—much less a similarly significant one—for interstate commerce
 16 crossing the California border. First, as Plaintiffs themselves allege, many of their
 17 members’ locomotives never even cross California’s borders and, thus, could not
 18 experience delays when doing so. FAC ¶ 18; SUF ¶¶ 26, 27. Second, and perhaps
 19 more importantly, none of the requirements at issue requires an operator to make a
 20 change—much less a time-consuming one—at the border. SUF ¶¶ 20-25.

21 The Idling Requirements apply only when a locomotive is *stationary in California*
 22 and cannot delay border crossings. SUF ¶ 28. These requirements also only apply to
 23 locomotives equipped with devices that are designed to limit idling to the same amount
 24 allowed by the Regulation: 30 minutes (absent specified conditions). And, as shown
 25 above, Plaintiffs’ members are already required, by federal regulations, to operate the
 26 idling devices in this manner. See *supra* 3:1-15. Even if some of Plaintiffs’ members are
 27 injured because they have to train their employees to manually shut-down certain
 28 locomotives (with malfunctioning AESS devices) faster than they otherwise would (*but*

1 see *supra* at 3:16-4:3), those “increased costs” would not “on [their] own, suffice to
 2 establish a substantial burden on interstate commerce.” *Ward*, 986 F.3d at 1241–42;
 3 see also *Exxon*, 437 U.S. at 127 (rejecting “notion that the Commerce Clause protects
 4 the particular ... methods of operation” of interstate companies). See SUF ¶ 29.

5 Plaintiffs likewise cannot establish that application of the Reporting and
 6 Recordkeeping Requirements to any of their members will “impede *the flow* of interstate
 7 goods.” *NPPC*, 598 U.S. at 380 n.2. The need to collect and report data about their
 8 locomotives’ California operations will not affect border crossings, much less delay
 9 interstate shipments as the reconfiguration requirements in *Southern Pacific Company*
 10 and *Bibb* did. Far from alleging any such effect, Plaintiffs claim only that their members
 11 will have to “undertake investments” in “their systems” in order to comply. FAC ¶ 91; see
 12 also, e.g., ECF No. 29-6 ¶ 14; SUF ¶ 30. Compliance costs of that sort do *not* constitute
 13 substantial burdens on interstate commerce—even when imposed on companies like
 14 airlines. *Ward*, 986 F.3d at 1242 (rejecting *Pike* claim against reporting requirement).
 15 And the same is true of the Administrative Payment Requirement which does nothing
 16 more than impose a \$175 per-locomotive cost.

17 **B. Plaintiffs’ Motion Should Be Denied**

18 If the Court denies Defendants’ motion, Plaintiffs’ motion should also be denied.
 19 As a threshold point, “any action taken ... within the scope of the congressional
 20 authorization is rendered invulnerable to Commerce Clause challenge.” *W. & S. Life Ins.*
 21 *Co. v. State Bd. of Equalization of Cal.*, 451 U.S. 648, 653 (1981). A California Court of
 22 Appeal has concluded that the Congress’s decision to provide waivers of preemption for
 23 California’s new motor vehicle emission regulations has this effect. *People ex rel. State*
 24 *Air Res. Bd. v. Wilmshurst*, 68 Cal. App. 4th 1332, 1345 (1999). The same is true of the
 25 analogous provision for non-road vehicle emission regulations: Section 209(e)(2)(A).
 26 “In-use requirements” are also congressionally authorized and “invulnerable” to dormant
 27 Commerce Clause challenge. This Court should not grant Plaintiffs’ summary judgment
 28

1 because of current uncertainty as to *which* part of the Clean Air Act authorizes which
 2 relevant parts of this Regulation. See *supra* Sec. II.

3 Plaintiffs' motion also fails on its merits. Plaintiffs assert they did not move for
 4 summary judgment on their *Pike* claim. Pl. MSJ 23:27-28. Instead, Plaintiffs ask for
 5 summary judgment "as a matter of law" simply because the Regulation applies to
 6 "instrumentalities of interstate transportation"—*i.e.*, locomotives. Pl. MSJ 23:18-19.
 7 There is no such claim that can prevail "as a matter of law." As Plaintiffs' own leading
 8 case illustrates, state laws—including those regulating trains—"will not be invalidated
 9 *without the support of relevant factual material.*" *S. Pac.*, 325 U.S. at 770 (emphasis
 10 added); see also *id.* 771-72 (reviewing detailed factual findings); *Union Pac. R.R. Co. v.*
 11 *Cal. Pub. Utilities Comm'n*, 346 F.3d 851, 870 (9th Cir. 2003) (requiring "the Railroads
 12 [to] demonstrate" burdens); *Raymond Motor Transp., Inc. v. Rice*, 434 U.S. 429, 444
 13 (1978) (considering "massive array of evidence").

14 In fact, courts apply the *Pike* test to state laws that regulate "instrumentalities of
 15 interstate transportation." Pl. MSJ 23:18-19. Even before *Pike* was decided, the
 16 Supreme Court considered an Illinois truck regulation and applied a test it later described
 17 as "similar in principle to the subsequent formulation in *Pike*." *Raymond Motor Transp.*,
 18 434 U.S. at 443 (describing *Bibb*, 359 U.S. 520). The Court also expressly rejected the
 19 argument that "*Pike* is not applicable to a State's regulation of motor vehicles." *Id.* at
 20 442; see also *Union Pac. R.R.*, 346 F.3d at 870 (identifying *Pike* as the applicable legal
 21 rule in challenge to state railroad regulation). The Court's recent decision in *NPPC* did
 22 not change these precedents, much less suggest that a plaintiff can establish an undue
 23 burden on interstate commerce without any evidence. The Court itself explained it was
 24 "say[ing] nothing new," *NPPC*, 598 U.S. at 378, and went on to reference cases involving
 25 non-discriminatory regulation of "trucks, trains, and the like" *in a discussion of the Pike*
 26 *test*, *id.* at 380 n.2. Far from establishing a new test allowing plaintiffs to establish undue
 27 burdens as a matter of law, the *NPPC* Court rejected attempts to expand the doctrine
 28 beyond its anti-protectionism heartland. *Id.* at 373-74, 377.

1 Plaintiffs allege no economic protectionism here, so *Pike* applies, just as in
 2 *Raymond Motor Transportation* and *Union Pacific*. Plaintiffs’ disavowal of their *Pike*
 3 claim, thus, leaves the Court with no law to apply, and their request for summary
 4 judgment must be denied.¹² To the extent the Court disagrees, Defendants are entitled
 5 to discovery to probe Plaintiffs claim that “[t]he Regulation ... imposes an unsustainable
 6 burden on the flow of interstate goods.” Pl. MSJ 24:26; see also Rule 56(d) motion.

7 **IV. DEFENDANTS ARE ENTITLED TO SUMMARY JUDGMENT ON PLAINTIFFS’ SCHEINER**
 8 **CLAIM AGAINST THE ADMINISTRATIVE PAYMENT REQUIREMENT**

9 Plaintiffs also allege that the Administrative Payment Requirement “independently
 10 violates the Dormant Commerce Clause” under *American Trucking Associations, Inc. v.*
 11 *Scheiner*, 483 U.S. 266, 285 (1987). FAC ¶ 124. Here, too, the Court dismissed
 12 Plaintiffs’ facial claims. MTD Order 19:19-20. Their as-applied claims also fail because
 13 this provision does not discriminate against interstate commerce. There is no factual
 14 dispute about that, and Defendants are entitled to summary judgment.

15 In *Scheiner*, the Court invalidated Pennsylvania’s flat taxes—levied to finance the
 16 maintenance and improvements of its highways and bridges—“because the methods by
 17 which [they were] assessed discriminate[d]” against interstate commerce. *Scheiner*, 483
 18 U.S. at 282. Specifically, the “cost per mile on [out-of-state] trucks” was “approximately
 19 five times as heavy” as that “borne by local trucks.” *Id.* at 286.

20 Since then, the Supreme Court and multiple Circuit Courts have confirmed that
 21 discrimination against interstate commerce—not an excessive burden under the *Pike*
 22 test—was dispositive in *Scheiner*. In *Comptroller of Treasury of Maryland v. Wynne*, 575
 23 U.S. 542, 562-63 (2015), the Court cited *Scheiner* as an example of “tax schemes that
 24 inherently discriminate against interstate commerce.” See also *Okla. Tax Comm’n v.*
 25 *Jefferson Lines, Inc.*, 514 U.S. 175, 197 (1995) (similar); *Trailer Marine Transp. Corp. v.*
 26 *Rivera Vazquez*, 977 F.2d 1, 10 (1st Cir. 1992) (*Scheiner* determines “whether
 27 discrimination exists”); *Doran v. Mass. Tpk. Auth.*, 348 F.3d 315, 319–20 (1st Cir. 2003)

28 ¹² Plaintiffs have also failed to identify an as-applied remedy to which they could
 be entitled if they prevailed on any Commerce Clause claim. See *infra* Sec. V.C.

(*Scheiner*'s "premise" was tax that "did not treat interstate and intrastate interests evenhandedly."); *Yerger v. Mass. Tpk. Auth.*, 395 F. App'x 878, 882–83 (3d Cir. 2010).

Plaintiffs have not alleged, much less established, that the Administrative Payment discriminates by treating out-of-state companies unfavorably. Plaintiffs allege only that CARB requires "an annual flat fee of \$175 per locomotive operated in California." FAC ¶ 124. But the Supreme Court has already rejected the argument that a "\$100 flat fee" imposed on trucks should be invalidated "in the absence of ... proof" of discriminatory effects. *Am. Trucking Ass'ns, Inc. v. Mich. Pub. Serv. Comm'n*, 545 U.S. 429, 436 (2005). Rather, to prevail a plaintiff has to "show that the flat assessment unfairly discriminates against interstate truckers," *id.* at 435—*i.e.*, that the costs recovered through the fee are "likely to vary significantly with truck-miles traveled" and interstate trucks generally travel fewer miles, *id.* at 437; *see also Trailer Marine Transp.*, 977 F.2d at 10 (invalidating flat-fee because transient trucks "presumptively ... cause far fewer accidents and impose far lower costs on the compensation fund").¹³

Plaintiffs cannot make such a showing here. The Administrative Payment was calculated to help defray:

the direct labor cost of staff that would be needed to implement and enforce the Proposed Regulation; the indirect labor cost of management, administrative, and information technology resources; and operational costs that would be needed to support enforcement efforts (surveillance system equipment, data storage, etc.). .

ECF 18-3 at 142; SUF ¶¶ 31-33. Unlike the road maintenance costs in *Scheiner*, these costs are far more likely to vary per locomotive than per mile.¹⁴ Indeed, many of the Regulation's provisions expressly apply on a per-locomotive basis, creating implementation and potential enforcement costs for each locomotive. *E.g.*, Cal. Code Regs., tit. 13, § 2478.4(f) ("Spending Account Calculation Per Locomotive"); § 2478.5

¹³ The fact that the fee at issue in *Michigan Public Service Commission* applied only to intrastate trucks was not dispositive. *See* MTD Order 21:12-13. That fact was relevant only because it made clear that the fee was not "an impermissible *discriminatory* roadblock." *Michigan Pub. Serv. Comm'n*, 545 U.S. at 437 (emphasis added).

¹⁴ Plaintiffs have also not shown that *interstate* locomotives travel fewer miles in California than *intrastate* locomotives. *See Scheiner*, 483 U.S. at 276; SUF ¶ 36.

(In-Use Operational Requirements applicable to individual locomotive); § 2478.6 (exception available on individual locomotive basis); § 2478.11(b) (per-locomotive reporting); SUF ¶¶ 34, 35. “[M]iles traveled within the State simply are not a relevant proxy” here. *Okla. Tax Comm’n*, 514 U.S. at 199. Defendants are entitled to summary judgment on this claim because “there is an absence of evidence to support” a conclusion that the Administrative Payment Requirement discriminates against interstate commerce as required to prevail under *Scheiner*. *Devereaux*, 263 F.3d at 1076.

V. PLAINTIFFS ARE NOT ENTITLED TO SUMMARY JUDGMENT ON THEIR REMAINING ICCTA CLAIMS

This Court dismissed Plaintiffs’ facial ICCTA preemption claims, MTD Order 17:3-22, and all claims against the Spending Account and In-Use Operational Requirements, *id.* 11:24-27. Plaintiffs are not entitled to summary judgment on the ICCTA claims that remain: as-applied claims against the Idling, Reporting and Recordkeeping, and Administrative Payment Requirements. Plaintiffs have not established that ICCTA preemption trumps the congressional authorizations provided in the CAA. Nor have Plaintiffs established that categorical ICCTA preemption applies here because these requirements are part of a comprehensive regulatory program that applies to mobile sources in California, generally. In other words, these regulatory requirements do not “target” railroads or otherwise “manag[e] or govern[] *rail transportation*.” Pl. MSJ 13:4-6 (internal quotation marks omitted, emphasis added). Indeed, these provisions regulate locomotive *emissions*—a subject over which the STB does not have jurisdiction. Finally, Plaintiffs’ motion should be denied because Plaintiffs have not identified the specific relief to which they are entitled.

A. The CAA’s Preservation of State Authority to Control Non-New Locomotive Emissions Protects the Regulation

Plaintiffs’ ICCTA preemption claims cannot be sustained because the CAA preserves state authority to control harmful emissions from non-new locomotives in several ways, one or more of which apply here. And this Court should decline Plaintiffs’ invitation to ignore the comprehensive regulatory structure Congress created for

locomotive emissions. Rather, Congress’s choices must be, and can be, harmonized with ICCTA. *E.g., Swinomish Indian Tribal Cmty. v. BNSF Ry. Co.*, 951 F.3d 1142, 1159 (9th Cir. 2020). However, until EPA acts on the pending authorization request, neither the parties nor the Court know for certain *which* Congressional authorization applies to *which* of the Regulation’s provisions at issue. As shown above, a primary jurisdiction stay would permit for orderly resolution of the outstanding claims in this case, after EPA resolves the issues now before it; and may also permit the parties and the Court to address particular issues that could arise in the meantime (e.g., through stipulated agreements and orders). If the Court declines to apply the primary jurisdiction doctrine, it should still deny Plaintiffs’ motion on their ICCTA claims because ICCTA did not impliedly repeal any of the Congressional authorizations provided in the CAA. Plaintiffs bear the burden of establishing otherwise and have not even attempted to do so.

First, Section 209(e)(2)(A) “clearly envision[s] the potential for California to regulate non-new locomotives.” 88 Fed. Reg. 77,004, 77,005-06 (Nov. 8, 2023). That provision requires EPA to “authorize” California emission “standards and other requirements” and “accompanying enforcement procedures” for non-new locomotives. 42 U.S.C. § 7543(e)(2)(A). To the extent that provision creates “an apparent conflict” with ICCTA’s preemption provision, this Court “must strive to harmonize the two laws, giving effect to both laws if possible.” *BNSF Ry. Co. v. California Dep’t of Tax & Fee Admin. (BNSF)*, 904 F.3d 755, 762 (9th Cir. 2018) (internal quotation marks omitted). And it can readily do so, as *BNSF* illustrates.

That case involved an ICCTA preemption challenge to a California law that required railroads to collect a fee from shippers of hazardous materials and to remit the fees to the State. *BNSF*, 904 F.3d at 759. Section 5125(f)(1) of the Hazardous Materials Transportation Act (HMTA) authorizes states to impose fees related to transportation of hazardous material by rail. *Id.* at 763, 766. The court concluded that it “should not read the preemption provision of the ICCTA to eliminate the protection from preemption provided by § 5125(f)(1) of the HMTA.” *Id.* at 765. Section 5125(f)(1) was

1 “easily harmonized [with the ICCTA] by reading § 5125(f)(1) of the HMTA to protect from
 2 preemption the fees specifically authorized in that section.” *Id.* at 762.¹⁵ Section
 3 209(e)(2)(A) can similarly be harmonized with ICCTA by concluding that the CAA
 4 protects California’s EPA-authorized regulation of non-new locomotive emissions. See
 5 also *BNSF Ry. Co. v. Albany & E. R.R. Co.*, 741 F. Supp. 2d 1184, 1198 (D. Or. 2010)
 6 (harmonizing ICCTA with antitrust law); *Cent. Valley Chrysler-Jeep*, 529 F. Supp. 2d
 7 1175-76 (harmonizing analogous CAA provision with another statutes).

8 Section 5125(f)(1)’s “narrow and specific” protection of fair fees relating to
 9 transportation of hazardous materials was neither controlled nor nullified by ICCTA’s
 10 “broad and general” preemption provision, *BNSF*, 904 F.3d at 766. And Section
 11 209(e)(2)(A) is equally narrow and specific—focusing exclusively on emissions from non-
 12 road vehicles and engines (and, as to locomotives, only those that are not new). Indeed,
 13 the 1990 amendments to the CAA reflect Congress’ highly specific determinations about
 14 locomotive emissions—that EPA shall promulgate standards for new locomotives, that all
 15 States are preempted from doing the same; that EPA shall authorize California
 16 “standards and other requirements,” and “accompanying enforcement procedures,” and
 17 that all State may impose “in-use requirements.” See *supra* 4:22-5:28. ICCTA
 18 establishes no clear intention to undercut Congress’s choices, as the STB has
 19 repeatedly recognized: “[N]othing in section 10501(b) [of ICCTA] is intended to interfere
 20 with the role of state and local agencies in implementing Federal environmental statutes,
 21 such as the Clean Air Act” *Swinomish Indian Tribal Cmty.*, 951 F.3d at 1157
 22 (quoting *Bos. & Me. Corp. & Town of Ayer, Mass.*, 2001 WL 458685, at *6 n.28 ((S.T.B.
 23 Apr. 30 2001)). Finally, Section 209(e)(2)(A) was preexisting law when ICCTA was
 24 enacted. Pub. L. No. 104-88, 109 Stat. 803 (1995) (ICCTA); Pub. L. No. 101-549, 104
 25 Stat. 2502 (Nov. 15, 1990) (Section 209(e)(2)(A)). Thus, the “strong presum[ption] ...
 26 that Congress will specifically address preexisting law when it wishes to suspend its

27 _____
 28 ¹⁵ The court ultimately concluded the fee at issue was not within the scope of
 Section 5125(f)(1) of HMTA, but that does not alter the harmonization analysis.

1 normal operations in a later statute” applies. *BNSF*, 904 F.3d at 766 (internal quotation
 2 marks omitted). Yet Congress gave no indication it intended ICCTA to upend its
 3 carefully balanced cooperative federalism approach to locomotive emission control.

4 Second, Congress also authorized state “in-use requirements” to control emissions
 5 from non-road vehicles and engines. 42 U.S.C. § 7547(d); *Engine Mfrs.*, 88 F.3d at
 6 1090. Thus, to the extent the requirements that remain at issue here are outside the
 7 scope of Section 209(e)(2)(A) because they are “in-use requirements,” those
 8 requirements are still protected by congressional authorization. And that authorization
 9 can just as easily be harmonized with ICCTA as Section 209(e)(2)(A) can. The “in-use
 10 requirement” authorization is specific and narrow, in contrast to ICCTA’s more general
 11 preemption. And there is no evidence that Congress intended ICCTA to override this
 12 earlier-enacted authorization.

13 Third, California has already submitted, to EPA, a commitment to adopt this
 14 Regulation in its State Strategy for the State Implementation Plan. Exh. 16 at 1, 34; Exh.
 15 17. The text of the CAA allows for such submissions; and if and when EPA approves
 16 them, such commitments become enforceable federal law. *Comm. for a Better Arvin*,
 17 786 F.3d at 1178-79 (citing 42 U.S.C. § 7410(a)(2)(A)). This part of the CAA can also be
 18 readily harmonized with ICCTA by preserving the central role Congress intended States
 19 to play in protecting the public health of their residents from harmful pollution—a role the
 20 STB does not, and cannot, play.¹⁶

21 To avoid the conclusion that the CAA protects these regulatory provisions, Plaintiffs
 22 “bear[] the heavy burden of showing a clearly expressed congressional intention that”
 23 ICCTA displaces the CAA. *BNSF*, 904 F.3d at 761 (cleaned up). Plaintiffs cannot meet
 24 that burden. They first miss the mark when they argue that Section 209(e)(2)(A)
 25 authorization would not “displace ICCTA preemption” because “EPA has neither the

26 ¹⁶ Unlike in *AAR*, CARB *has* submitted a relevant measure for approval into the
 27 SIP. CARB is also actively pursuing Section 209(e)(2)(A) authorization which can be a
 28 prerequisite to SIP submission for regulations covered by Sections 209(b)(1) or
 209(e)(2)(A). See *supra* at 5:25-6:2. To the extent this Court nonetheless concludes
 that *AAR* forecloses this argument, Defendants preserve it for further review.

1 expertise nor the authority to alter the STB's exclusive jurisdiction." Pl. MSJ 17:4.
 2 Congress itself already displaced ICCTA preemption as to locomotive emissions, giving
 3 EPA (not the STB) jurisdiction over new locomotive emissions and preserving a role for
 4 state regulation of non-new locomotive emissions. Plaintiffs' reliance on *AAR* is equally
 5 misplaced, Pl. MSJ 16:26-17:2, because CARB has initiated a SIP process, Exh. 17;
 6 *AAR*, 622 F.3d at 1098 (discussing future SIP submittal). Moreover, unlike in *AAR*, two
 7 of the harmonization analyses here involve *extant* federal law: provisions of the CAA—
 8 Section 209(e)(2)(A) and Sections 213(d) and 209(d). See *AAR*, 622 F.3d at 1098.
 9 Finally, Plaintiffs assert that the potential for patchwork regulation precludes
 10 harmonization here. Pl. MSJ 17:7. The Ninth Circuit has not considered that when
 11 harmonizing ICCTA with other federal statutes. *E.g.*, *BNSF*, 904 F.3d at 761-771. And
 12 Plaintiffs identify no reason to depart from those precedents here. Nor is there one.
 13 Congress ensured there would be no patchwork of "standards and other requirements"
 14 and "accompanying enforcement procedures" here, 42 U.S.C. § 7543(e)(2)(B) (requiring
 15 identity), and Congress itself chose to allow each State to adopt its own "in-use
 16 requirements." Any "patchwork" that results reflects Congress's choice.

17 The CAA and the ICCTA are "capable of coexistence." *BNSF Ry. Co.*, 904 F.3d at
 18 762. Plaintiffs are not entitled to summary judgment because ICCTA does not preempt
 19 any part of the Regulation that is authorized by EPA under Section 209(e)(2)(A); any part
 20 of the Regulation that is an "in-use requirement"; or any part of the Regulation—or the
 21 commitment to adopt such a Regulation—that is part of California's SIP.

22 **B. Plaintiffs Have Not Established that Categorical Preemption** 23 **Applies Here**

24 Plaintiffs have sought summary judgment only on their "categorical preemption
 25 theory." Pl. MSJ 13:13-14. But categorical preemption does not apply here.

26 First, categorical preemption only applies where the STB's "jurisdiction is
 27 *exclusive*." *Oregon Coast Scenic R.R., LLC v. Oregon Dep't of State Lands*, 841 F.3d
 28 1069, 1073 (9th Cir. 2016). The STB does not have exclusive jurisdiction over

locomotive emissions. Rather, Congress gave that jurisdiction to EPA (and, to some extent, to the States). See *supra* 2:20-27, 4:23-5:28. Thus, just as “ICCTA does not preempt state rules relating to railroad safety because such rules” operate under the “umbrella” of another federal statute (the Federal Rail Safety Act), ICCTA does not preempt state emission controls that operate under the CAA’s umbrella. *Belt Ry. Co. of Chicago v. Weglarz Hotel III, L.L.C.*, No. 18 C 7361, 2020 WL 6894664, at *4 (N.D. Ill. Nov. 24, 2020) (citing *Tyrrell v. Norfolk S. Ry. Co.*, 248 F.3d 517, 523 (6th Cir. 2001)). In other words, these requirements do not “have the effect of managing or governing rail transportation,” within the meaning of ICCTA. *Delaware v. Surface Transportation Bd.*, 859 F.3d 18, 19 (D.C. Cir. 2017).¹⁷

Second, categorical preemption does not apply because the regulatory provisions at issue do not “target[] the railroad industry.” *Delaware*, 859 F.3d at 19 (internal quotation marks omitted); see *also* Pl. MSJ 13:4-5. Rather, these requirements are “laws of general applicability.” *AAR*, 622 F.3d at 1097.¹⁸ They are part of a comprehensive program regulating mobile source emissions—a program that imposes idling limits, as well as recordkeeping and reporting obligations, on many other types of vehicles: from trucks and buses to ships, bulldozers, and graders. The requirements imposed on heavy-duty trucks are particularly germane here because Plaintiff AAR has compared the emissions of those trucks with those of locomotives. Exh. 3 at 1 (“[L]ocomotives are ... cleaner than trucks on an emissions per ton-mile basis”) (internal quotation marks omitted). Locomotives may not have been subject to such requirements before now, but their *addition* to California’s mobile source regulations does not make that regulatory program *less* generally applicable. See *Parents for Priv. v. Barr*, 949 F.3d 1210, 1236 (9th Cir. 2020) (rule was “generally applicable” under First Amendment because it did not “selectively impose[] certain conditions or restrictions only on religious

¹⁷ To the extent this argument is foreclosed by *AAR*, Defendants preserve it for further review.

¹⁸ Such laws are preempted under ICCTA only if they “unreasonably interfere with interstate commerce.” *Id.* Plaintiffs have not sought summary judgment on that issue.

conduct”). Put simply, the extension of California’s broad mobile-source emissions control program to include locomotives “does not discriminate against rail carriage.” *New York Susquehanna & W. Ry. Corp. v. Jackson*, 500 F.3d 238, 254 (3d Cir. 2007).

Specifically, CARB regulations prohibit large diesel-fueled commercial motor vehicles (including heavy-duty trucks) from idling “for more than 5 consecutive minutes at any location” in California. Cal. Code Regs., tit. 13, § 2485(c)(1)(B)(1). Off-road diesel-fueled vehicles and engines—e.g., backhoes and excavators—are likewise generally prohibited from idling “for more than five consecutive minutes,” with limited exceptions similar those provided for locomotive operators. *Id.* § 2449(d)(2)(A). CARB also restricts idling by school buses and other buses near schools, *id.* § 2480; and by harbor craft, Cal. Code Regs., tit. 17, § 93118.5(h). And CARB requires ocean-going vessels to reduce emissions while “at-berth” in California, allowing them to do so by plugging in to shore power. *Id.* § 93130.7.

CARB also requires many mobile sources of harmful pollution to register, report information, and keep records, as the Regulation does for locomotives.¹⁹ For example, owners and operators of fleets of off-road diesel-fueled vehicles and engines must report information about each vehicle and the fleet’s operations annually. Cal. Code Regs., tit. 13, § 2449(g). Commercial harborcraft owners and operators must likewise comply with detailed recordkeeping and reporting requirements. Cal. Code Regs., tit. 17, § 93118.5(m), (n), (o). As must many others.²⁰

CARB does not apply idling or reporting requirements “exclusively” to locomotives. *AAR*, 622 F.3d at 1098. Certainly, the specific requirements imposed on a category of

¹⁹ Requiring railroads to report emissions and other data, to keep EPA-mandated idling devices in good repair, to operate those devices as intended, and to manually shut-off stationary trains when those devices are inoperable does not have “the effect of managing or governing rail transportation” within the meaning of 49 U.S.C. § 10501(b). To the extent *AAR* adopted a broader understanding that applies here, Pl. MSJ 3:13-16, Defendants preserve this issue for further review.

²⁰ The full set of mobile sources subject to reporting requirements is too voluminous to provide here. See also e.g., Cal. Code Regs., tit. 13 § 2479(i), (j) (cargo handling equipment); *id.* § 2490.3 (large transportation network companies); *id.* §§ 2014(a), 2014.1(a)(6)(D) (drayage truck fleets); *id.* §§ 2015.4, 2015.5 (sizable heavy-duty fleets); Cal. Code Regs., tit. 17, 93130.7(e), (f), (g) (ocean-going vessels).

1 vehicles or engines may differ based on its characteristics. Thus, heavy-duty trucks may
 2 idle for only 5 minutes while locomotives may idle for 30. *Compare* Cal. Code Regs., tit.
 3 13, § 2485(c)(1)(B)(1) *with id.* § 2478.9. But similar variation exists in regulations
 4 adopted under generally applicable statutes such as the Occupational Safety and Health
 5 Act (OSHA). *E.g.*, 29 C.F.R. § 1910.178-1910.184 (“Materials Handling and Storage”
 6 requirements for, *inter alia*, “powered industrial trucks,” “crawler locomotive and truck
 7 cranes,” and “helicopters”); *see also* *Donovan v. Coeur d’Alene Tribal Farm*, 751 F.2d
 8 1113, 1115 (9th Cir. 1985) (OSHA is “is a statute of general applicability”). Recognizing
 9 the different needs (and emission-reduction capabilities) of different types of vehicles
 10 does not “discriminate against railroads” (or any other type of vehicle). *Adrian &*
 11 *Blissfield R. Co. v. Village of Blissfield*, 550 F.3d 533, 541 (6th Cir. 2008). Categorical
 12 ICCTA preemption does not apply.

13 **C. Plaintiffs Have Not Identified a Remedy to Which They Would Be**
 14 **Entitled Even If They Could Prevail**

15 It is Plaintiffs’ burden to identify “what *specific* relief” they would be entitled to in the
 16 event they prevailed on their remaining, as-applied ICCTA claims. *Physicians Surgery*
 17 *Ctr. of Chandler v. Cigna Healthcare Inc.*, 550 F. Supp. 3d 799, 812 (D. Ariz. 2021)
 18 (emphasis added); *see also* *Soriano v. Countrywide Home Loans, Inc.*, No. 09-CV-
 19 02415-LHK, 2011 WL 13073307, at *2 (N.D. Cal. May 10, 2011) (“It is Plaintiff’s burden
 20 to identify to what restitution or injunctive relief he is entitled as a remedy for the alleged
 21 violation.”). Plaintiffs have not met that burden here, and there is no reason to proceed
 22 to summary judgment without an identified, available, and administrable remedy.

23 Plaintiffs seek a declaration that “the Regulation” is “unlawful,” and an injunction
 24 preventing enforcement “against Plaintiffs’ members.” PI. MSJ 25:22-23. Plaintiffs are
 25 not entitled to facial declaratory relief because not all locomotives operating in California
 26 fall within ICCTA’s preemptive scope. MTD Order 17:19-22. And because some of
 27 Plaintiffs’ members or their locomotives fall outside that scope, *see supra* 9:23-11:2;
 28 Plaintiffs are not entitled to the injunctive remedy they seek. *Oracle USA, Inc. v. Rimini*

1 *St., Inc.*, 81 F.4th 843, 857 (9th Cir. 2023) (rejecting injunction reaching conduct that was
2 not unlawful).²¹

3 Plaintiffs have thus far failed to identify the “subset of ... applications” they claim
4 are preempted by ICCTA. *Hoye v. City of Oakland*, 653 F.3d 835, 857 (9th Cir. 2011).
5 In other words, “Plaintiffs have not made a good faith attempt to distinguish between
6 covered and uncovered [locomotives].” *SocialCom, Inc. v. Arch Ins. Co.*, No. 2:20-CV-
7 04056-SB-AGR, 2021 WL 10417393, at *4 (C.D. Cal. Nov. 4, 2021). And contrary to
8 Plaintiffs’ suggestion, ICCTA preemption does not attach to a given railroad for all
9 purposes. Rather, ICCTA preemption may apply to *some* of a railroad’s activities or
10 locomotives, but not to others. *See supra* 9:12-17. And whether or not ICCTA
11 preemption applies is a fact-intensive inquiry. *See also All Aboard Fla. F Operations*
12 *LLC & All Aboard Fla. F Stations*, No. FD 35680, 2012 WL 6659923, at *3 (Dec. 21,
13 2012). And at least some of Plaintiffs’ members with operations in California provide
14 some rail transportation that is outside that scope. *See supra* 9:23-11:2.

15 The information necessary to craft an appropriate and administrable remedy here –
16 should Plaintiffs prevail on any claims—is in the hands of Plaintiffs’ members. To the
17 extent Plaintiffs have not identified an available and administrable remedy because they
18 cannot access that information, they lack standing. *Rocky Mountain Farmers Union v.*
19 *Corey*, 913 F.3d 940, 950 (9th Cir. 2019).²² In any event, this Court should not rush to
20 judgment—while interfering with EPA’s ongoing proceeding—where Plaintiffs have not
21 identified a remedy to which they would be lawfully entitled. To the extent the Court is
22 inclined to do so, Defendants respectfully request it defer and grant their Rule 56(d)
23 motion on this remedial issue.

24
25
26 ²¹ Underscoring the point, Plaintiffs have not identified which railroads operating in
27 California are “members.” SDF ¶ 20-23.

28 ²² For example, Plaintiffs’ declarants claim that some of their locomotives provide
transport as part of the interstate rail network, *e.g.*, ECF No. 29-9 ¶ 2, but fail to establish
that they provide *no* transportation *outside* ICCTA’s preemptive scope.

VI. SHOULD THE COURT CONCLUDE THAT ANY PART OF THE REGULATION IS INVALID, DEFENDANTS REQUEST THE OPPORTUNITY TO ADDRESS SEVERABILITY

In the event the Court concludes that one or more parts of the Regulation are invalid, Defendants request the opportunity to submit supplemental briefing on the severability of that part or parts. “[C]ourts ... should avoid nullifying an entire statute [or regulation] when only a portion is . . . invalid.” *Vivid Entm’t, LLC v. Fielding*, 774 F.3d 566, 573-74 (9th Cir. 2014). “The need for deference and restraint in severing a state or local enactment is all the more acute because of [the federal courts’] respect for federalism and local control.” *Id.* at 574. In assessing severability, this Court is “bound by state statutes and state court opinions.” *Project Veritas v. Schmidt*, 72 F.4th 1043, 1063 (9th Cir. 2023). “In California, courts ‘look first to any severability clause,’” which creates “‘a presumption in favor of severance.’” *Sam Francis Found. v. Christies, Inc.*, 784 F.3d 1320, 1325 (9th Cir. 2015) (en banc) (quoting *Cal. Redev. Ass’n v. Matosantos*, 53 Cal. 4th 231, 270 (2011)). The Regulation has such a severability clause. Cal. Code Regs., tit. 13, § 2478.17(a). Defendants would show the resulting presumption cannot be overcome for any of the challenged provisions. However, Defendants cannot make a provision-by-provision showing here. They therefore respectfully submit that issues of severability be briefed only if and when the Court has issued an opinion concluding that specific provisions are unlawful.

CONCLUSION

Defendants respectfully request the Court grant Defendants summary judgment on all claims against the Idling Requirements and stay the remainder of this litigation under the primary jurisdiction doctrine. In the alternative, Defendants respectfully request the Court grant Defendants summary judgment on all dormant Commerce Clause claims and deny Plaintiffs’ motion on all claims.

1 Dated: March 5, 2024
